Tanzeel UR Rehman

Roles

Managed web based applications
Front end Developer
Back end Developer
Data Annotation

Technologies

React.js

Next.js (App Router, SSR/SSG/ISR)

Node.js

PostgreSQL

Supabase (Auth, Storage, Realtime)

Prisma ORM

Elasticsearch

Tailwind CSS

shadcn/ui

Radix UI

Vercel

Git & GitHub

Gitea

REST APIs

OCR (Tesseract / equivalent)

LLaMA (LLM integration)

Industries

Horizon Tech Services

Functional Expertise

Education

Bachelor's in Software Engineering
2021-2024
• Comsats Islamabad

Summary

Software engineer with proficiency in programming languages and experience in Agile methodologies with 2.5 years of experience in full lifecycle software development. Strong expertise in Node.js and Python, RESTful APIs, scalable backend systems, and cloud-based deployments. Hands-on experience with SQL/NoSQL databases, Linux environments, and modern DevOps practices.

Relevant Development Engagements

Horizon tech
(**Aug 2024 – Present**)

Full Stack

- Designed and developed scalable backend services using Node.js and Python

- Built RESTful APIs with secure authentication and JSON-based communication

- Worked with PostgreSQL, Prisma ORM, and Supabase for data management

- Deployed and monitored applications in Linux environments

- Implemented logging, error handling, and version control using Git

Frontend Development: Built a responsive and modern UI with **Next.js, TailwindCSS, and shadcn/ui**, reusing components from prior projects for upload forms, summary cards, and save/export dialogs.

OCR Integration: Processed uploaded PDFs with embedded images, converting scanned content into machine-readable text.

LLM Summarization: Integrated **LLaMA model** for generating structured summaries (5–8 key points) and alternate formats (essay-style, corrected grammar, notes).

Database Management: Used **PostgreSQL** for storing documents, summaries, and user history for retrieval and editing.

JOYN Digital
(**Aug 2023 – Aug 2024**)

- Developed backend services using Node.js and Python

- Implemented REST APIs and integrated SQL/NoSQL databases

- Participated in full SDLC including testing, debugging, and deployment

- Collaborated in Agile teams and managed code via Git.

Projects

Smart Document Summarizer (AI-powered OCR & LLM)

- Built an AI-based system for OCR text extraction and summarization
- Integrated LLaMA LLM for structured summaries
- Used PostgreSQL for document and summary storage

StyleNest – E-commerce Web Application

- Developed scalable backend APIs and authentication workflows
- Integrated Supabase, PostgreSQL, and Next.js
- Deployed cloud-ready application

Visa Risk Management System

- Implemented backend logic to categorize visa applications
- Designed PostgreSQL schema and API services
